ORDERS – Purchasing order

ECR-Austria

EANCOM 2002 (Syntax 3)

Version 1.8

Message Type: ORDERS

Message Version: 010(EANCOM)

Responsible Agency: GS1-Austria

Directory Name: EDIFACT

Directory Version: D.01.B

About this document

EDIFACT is a set of internationally agreed standards for the electronic interchange of data that was limited in form of EANCOM to those components which are really relevant for the consumer goods industry. The goal of the Austrian ECR-Initiative is, based on EANCOM to develop more precise standard profiles applicable in the Austrian consumer goods industry.

The practice in Austria today shows that normally two potential business partners which are intending to exchange data electronically come together with EANCOM specialists (GS1-Austria, Converter provider) and develop specific application profiles from the EANCOM standard which corresponds to their specific business needs. In order to save time and efforts it is necessary to try to reduce the complexity.

Standard application profiles should be seen as a recommendation from ECR-Austria-Initiative aiming to promote fast and area-wide implementation of EANCOM. They should unify the interpretation of all contained fields and cover „90 %“ of the business requirements. All requirements which are not a part of these standard application profiles have to be agreed bilateral between business partners.

All data fields marked as mandatory in the current documentation are considered as obligatory components in all EANCOM messages.

Within the second phase of the ECR-Austria-Initiative the message guidelines from the ECR-book defined in the first phase were adapted to the new business requirements and new standard application profiles were developed.

This document describes the data fields defined for this message type using EANCOM syntax. It deals only with these EANCOM-segments that are really relevant for the business purposes. **Therefore this document does not describe the whole set of EANCOM standards and does not replace the EANCOM manual.**

By this reason it is recommended by the implementation of this message to use beside this guideline also the EANCOM manual (available by GS1-Austria).

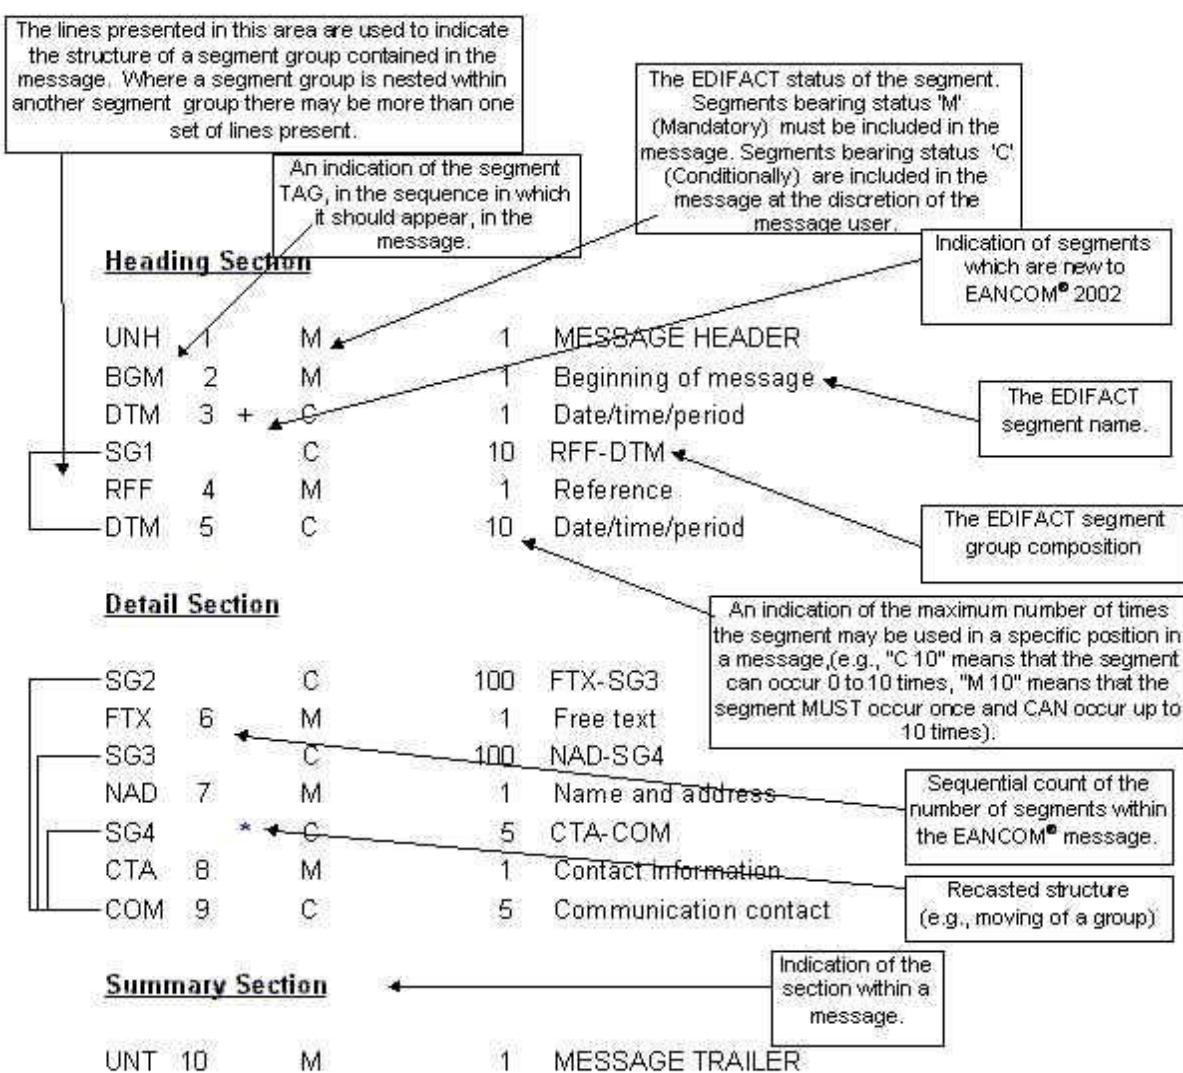

Document structure

1. Message structure
2. Business terms
3. Segment description

Message Structure Chart

Within every EANCOM® message a diagram is presented which explains the structure of the message.

The message structure chart is a sequential chart which presents the message in the sequence in which it must be formatted for transmission. Every message is structured and consists of three sections; a header, detail, and summary section. An example of a message structure chart follows:

Segments Layout

This section describes each segment used in the EANCOM Purchasing order message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM subset are indicated.

Notes:

1. The segments are presented in the sequence in which they appear in the message. The segment or segment group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.
2. Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in the third column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

Following the EDIFACT information, EANCOM specific information is provided in the fourth, fifth and sixth columns. In the fourth column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fifth column the restricted indicator (see point 3 on the following page), and in the sixth column notes and code values used for specific data elements in the message.

2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM.

2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

- REQUIRED	R	Indicates that the entity is required and must be sent.
- ADVISED	A	Indicates that the entity is advised or recommended.
- DEPENDENT	D	Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.
- OPTIONAL	O	Indicates that the entity is optional and may be sent at the discretion of the user.
- NOT USED	N	Indicates that the entity is not used and should be omitted.

- 2.3 If a composite is flagged as **N, NOT USED**, all data elements within that composite will have blank status indicators assigned to them.
3. Status indicators detailed in the fifth column which directly relate to the code values detailed in the first column may have two values:
- RESTRICTED * A data element marked with an asterix (*) in the fifth column is (are) the only codes available for use with this data element, in this segment, in this message.
 - OPEN All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterix in fourth column). The available codes are listed in the EANCOM Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.

1000 Document name	C an..35	N					
C106 Document/message identification	C	R					
1004 Document identifier	C an..35	R		Order number; assigned by the document sender.			
1056 Version identifier	C an..9	N					
1060 Revision identifier	C an..6	N					
1225 Message function code	C an..3	R	*	9 = Original 42 = Confirmation via specific means			
4343 Response type code	C an..3	N					
<u>Segment notes</u>							
- Message type - Order (DE1001 = 220); Mandatory *); A/N 3 BGM+220+3574+9'							
- Message type - Cross docking order (DE1001 = 402); Mandatory *); A/N 3; see also the NAD-Segment BGM+402+3575+9'							
- Message type - Rush order (DE1001 = 224); Mandatory *); A/N 3 BGM+224+3576+9'							
- Message type - CRP-Order (Manufacturer raised order) (DE1001 = 22E); Mandatory *); A/N 3 Please note: In this case the order is sent from the manufacturer to the retailer BGM+22E::9+3574+9'							
- Order number (DE1004); Mandatory; A/N 16							
*) One of these message types (together with the order number) must be set.							
DE1225:							
Qualifier 42 (confirmation via specific means) is only used for confirmation of a previous order sent by means other than EDI, e.g. Fax (not to confound with ORDRSP - 'purchase order response'). In all other cases Qualifier 9 (Original) should be used.							
DE 3055: This data element can just be used, if DE 1001 includes an EAN code.							

DTM - M		3 - Date/time/period			
Function : To specify date, and/or time, or period. Segment number : 3					
Data element group/Data element	EDIFACT	ANW	*	Description	
C507 Date/time/period	M	M	*		
2005 Date or time or period function code qualifier	M an..3	M	*	2 = Delivery date/time, requested 137 = Document/message date/time 63 = Delivery date/time, latest 64 = Delivery date/time, earliest 200 = Pick-up/collection date/time of cargo	
2380 Date or time or period value	C an..35	R			
2379 Date or time or period format code	C an..3	R	*	102 = CCYYMMDD 203 = CCYYMMDDHHMM	

Segment notes

- Message date (DE2005 = 137); Mandatory; D 8
DTM+137:19990610:102'
- Delivery date/time (DE2005 = 2); Optional; D 8 - D 12
DTM+2:199906201200:203'
- Delivery date/time, earliest (DE2005 = 64); Optional; D 8
DTM+64:20050712:102'
- Delivery date/time, latest (DE 2005 = 63); Optional; D 8
DTM+63:20050715:102'
- Pick-up/collection date/time of cargo, (DE2005=200), Optional, D8-D12
DTM+200:201907081000:203'

REMARK:
The following rules apply when using 'Delivery date':

- only Qualifier 2 or
- Qualifier 64 and 63 together or
- only Qualifier 64 or
- only Qualifier 63
- or only Qualifier 200

The Delivery date in this message is an optional field and should be provided either in the heading section or for each position. In case that Delivery date is submitted as well in the heading section as on position level, the information on position level will override the information in the heading section.

FTX - C		2 - Free text

1131 Code list identification code	C an..17	D		Industry code list number			
3055 Code list responsible agency code	C an..3	D		90 = Assigned by manufacturer 91 = Assigned by supplier or supplier's agent			
7008 Item description	C an..256	D		ECR allows max. 70 symbols			
7008 Item description	C an..256	N					
3453 Language name code	C an..3	N					
7383 Surface or layer code	C an..3	N					
<u>Segment notes</u>							
The usage of this segment is highly not recommended.							
The IMD-Segment should be only used when the article can not be completely identified by EAN - Article number (see also ECR-Handbook chapter VIII).							
In this case the article can be specified by an internal industry code (assigned by the manufacturer) (DE7009). The codes in DE7009 must be published by the manufacturer. The code list itself can be specified in DE1131. DE3055 is used to specify the code list responsible agency (industry).							
In the IMD-Segment it is also possible to specify the in a free text form (DE7008).							
- Identification by using industry code list (DE7009); Optional; A/N 17 DE7077 = B DE7081, DE7009, DE1131 and DE3055 are filled. DE7008 remains empty.							
Example: Code from the industry code list with value 001 is sent. IMD+B+35+4711:001:90'							
- Article description in free text form (DE7008), Optional; A/N 70 DE7077 = A DE7081, DE7009, DE1131 and DE3055 remain empty. DE7008 is filled.							
Example: IMD+A++:::ARTICLE DESCRIPTION'							
DE7081: For further codes see the code list.							

SG28 - M	200000 - LIN-IMD-QTY-DTM-FTX-SG32-SG33			
QTY - M	1 - Quantity			
Function : To specify a pertinent quantity.				
Segment number : 11				
Data element group/Data element	EDIFACT	ANW	*	Description
C186 Quantity details	M	M		
6063 Quantity type code qualifier	M an..3	M		21 = Ordered quantity
6060 Quantity	M an..35	M		
6411 Measurement unit code	C an..3	D		KGM = Kilogram LTR = Liter
<u>Segment notes</u>				
- Ordered quantity; Mandatory; N 7+3				
QTY+21:50'				
DE6411: Measurement unit by variable quantity products (unit is not equal piece).				
For further codes see the code list.				

SG28 - M 200000 - LIN-IMD-QTY-DTM-FTX-SG32-SG33				
DTM - C 3 - Date/time/period				
Function : To specify date, and/or time, or period. Segment number : 12				
Data element group/Data element	EDIFACT	ANW	*	Description
C507 Date/time/period	M	M		
2005 Date or time or period function code qualifier	M an..3	M	*	364 = Minimum shelf life remaining at time of despatch period 2 = Delivery date/time, requested 63 = Delivery date/time, latest 64 = Delivery date/time, earliest 200 = Pick-up/collection date/time of cargo
2380 Date or time or period value	C an..35	R		
2379 Date or time or period format code	C an..3	R	*	102 = JJJJMMTT 203 = JJJJMMTTHHMM 804 = Day
<u>Segment notes</u>				
- Delivery date for the current position (only if different from Header)(DE2005 = 2); Optional; D 12 DTM+2:200606120930:203'				
- Delivery date/time, earliest (DE2005 = 64); Optional; D 8 DTM+64:20050712:102'				
- Delivery date/time, latest (DE 2005 = 63); Optional; D 8 DTM+63:20050715:102'				
- Pick-up/collection date/time of cargo, (DE2005=200), Optional, D8-D12 DTM+200:201907081000:203'				
REMARK: The following rules apply when using 'Delivery date': - only Qualifier 2 or - Qualifier 64 and 63 together or - only Qualifier 64 or - only Qualifier 63 - or only 200				
The Delivery date in this message is an optional field and should be provided either in the heading section or for each position. In case that Delivery date is submitted two times, as well in the heading section as on position level, the information on position level will override the information in the heading section.				
- Minimum shelf life remaining at time of despatch period (in days) (DE2005 = 364 and DE2379 = 804); Optional; N 3 DTM+364:30:804'				

SG28 - M	200000 - LIN-IMD-QTY-DTM-FTX-SG32-SG33			
FTX - C	2 - Free text			
Function : To provide free form or coded text information.				
Segment number : 13				
Data element group/Data element	EDIFACT	ANW	*	Description
4451 Text subject code qualifier	M an..3	M	*	PUR = Purchasing information CLR = Loading remarks
4453 Free text function code	C an..3	N		
C107 Text reference	C	D		
4441 Free text value code	M an..17	M		Presort storing space in connection with DE4451 = CLR
1131 Code list identification code	C an..17	N		
3055 Code list responsible agency code	C an..3	N		
C108 Text literal	C	D		
4440 Free text value	M an..512	M		ECR allows max. 70 symbols
4440 Free text value	C an..512	N		
4440 Free text value	C an..512	N		
4440 Free text value	C an..512	N		
4440 Free text value	C an..512	N		
3453 Language name code	C an..3	N		
4447 Free text format code	C an..3	N		
<u>Segment notes</u>				
- Free text/Purchasing information (DE4440); Optional; A/N 70 FTX+PUR+++FREE PURCHASING INFORMATION'				
- Presort storing space in cross docking process (DE4451 = CLR und DE4441); Optional; A/N 17 FTX+CLR++3' The logistic unit must be presorted on the truck at rank 3 at the delivery.				

SG28 - M	200000 -	LIN-IMD-QTY-DTM-FTX-SG32-SG33		
SG32 - C	1 -	PRI		
PRI - M	1 -	Price details		
Function : To specify price information.				
Segment number : 14				
Data element group/Data element	EDIFACT	ANW	*	Description
C509 Price information	C	R		
5125 Price code qualifier	M an..3	M	*	AAA = Calculation net
5118 Price amount	C n..15	R		
5375 Price type code	C an..3	N		
5387 Price specification code	C an..3	N		
5284 Unit price basis value	C n..9	N		
6411 Measurement unit code	C an..3	N		
5213 Sub-line item price change operation code	C an..3	N		
<u>Segment notes</u>				
- Net price; Optional; N 7+3				
PRI+AAA:55'				
If price information is used the currency must be specified in CUX-Segment (Heading section).				

SG28 - M	200000 -	LIN-IMD-QTY-DTM-FTX-SG32-SG33		
SG33 - C	1 -	RFF		
RFF - M	1 -	Reference		
Function : To specify a reference.				
Segment number : 15				
Data element group/Data element	EDIFACT	ANW	*	Description
C506 Reference	M	M		
1153 Reference code qualifier	M an..3	M	*	PD = Promotion deal number
1154 Reference identifier	C an..70	R		
1156 Document line identifier	C an..6	N		
4000 Reference version identifier	C an..35	N		
1060 Revision identifier	C an..6	N		
<u>Segment notes</u>				
This segment is used to specify the promotion deal number to which the whole order refers.				
- Promotion deal number (DE1154); Optional; A/N 16 RFF+PD:2312'				

UNS - M	1 - Section control			
Function :	To separate header, detail and summary sections of a message.			
Notes:				
1. To be used by message designers when required to avoid ambiguities. Mandatory only if specified for the type of message concerned.				
Segment number :	16			
Data element group/Data element	EDIFACT	ANW	*	Description
0081 Section identification	M a1		*	S = Detail/summary section separation
<u>Segment notes</u>				
This segment is used to separate the detail and summary sections of the message.				
Example: UNS+S'				

UNT - M	1 - Message trailer			
Function : Segment number :	To end and check the completeness of a message. 17			
Data element group/Data element	EDIFACT	ANW	*	Description
0074 Number of segments in the message	M n..6	M		The total number of segments in the message is detailed here.
0062 Message reference number	M an..14	M		The message reference number detailed here should equal the one specified in the UNH segment.
<u>Segment notes</u>				
This segment is a mandatory UN/EDIFACT segment.				
Example: UNT+83+ME000001'				

Example:
